Current Status

- The June 2001 issue is ready.
- Four forthcoming issues almost completed (this takes us to June 2002).
- Solid financial status
- Minimum additional expenses
- Expectation: Moderate increase of
  - Non-member income
  - Advertisements income
Improvements in place

- Review form available on the web
- Reduce review cycle by:
  - Author notification(s) by e-mail
  - Review collection by e-mail
  - Accept the "complete files" of final version papers by e-mail
- Encourage and eventually enforce e-submissions
  (this will reduce further the whole review cycle)
- Revise the magazine look again
Major Problem Area

• The number of the per month contributed papers is not satisfactory! It has not been satisfactory for close to a two year period!
• Considering that the acceptance rate has dropped below 50% this will create a major problem in the future: *The Magazine will rely mostly on invited issues!*
• Q1: Should we discuss the “level of support” to sister publications from other Societies?
• Q2: Should we discuss / redefine the scope of the Magazine?
• Personal view: RAM serves the Society. It is essential, it must grow further under all costs!
