- Assuming the surplus was 20% of the total expense, we have
  \[(480 \text{ N} - \text{Expense}) = \text{Expense} \times 0.2\]
- \[1.2 \times \text{Expense} = 480 \text{ N}\]
- \[\text{Expense} = 400 \text{ N}\]
- \[\text{Surplus} = 80 \text{N} > 25\text{N}\]
- As a total, we will still have surplus.
