

**Call for Nominations: Editors and Associate Editors for  
IEEE Transactions On Automation Science and Engineering (T-ASE)  
Deadline: October 1, 2026**

The IEEE Trans. On Automation Science and Engineering (T-ASE, <https://www.ieee-ras.org/publications/t-ase>) is soliciting nominations for multiple Editors and Associate Editors, with a term beginning January 2027. Automation is in an unprecedented exciting and challenging era in view of machine learning, artificial intelligence, Industrial 4.0, and supply chain. Editors and Associate Editors play important roles in ensuring the quality of publications and in guiding the general development of the Transactions, in multiple capacities including implementing reviews of manuscripts according to IEEE guidelines, soliciting emerging topical articles for special issues, guiding the overall direction of the publication, and providing feedback from the readership. Active participations are expected in the annual IEEE Conference on Automation Science and Engineering (IEEE CASE) and in at least one of the two editorial board meetings held annually in conjunction with the IEEE International Conference on Robotics & Automation (ICRA) and IEEE CASE. Furthermore, it is mandatory to participate in T-ASE Editorial Board Workshop (during IEEE CASE) if it is offered.

The term of an Editor or Associate Editor normally consists of a one-year probation period followed by four years (for Editor) or two years (for Associate Editor) of additional service if performance is satisfactory.

**Nomination Criteria:**

- Must have expertise relevant to Automation.
- Must have editorial experience with other journals or conferences.
- Excellent English language skills.
- Previous participation in IEEE CASE is strongly preferred.

Nominations should include a resume (not to exceed three pages), a complete list of journal publications, previous experience with publications as a reviewer or in editorial capacities, and areas of technical expertise. (Previous experience with T-ASE is preferred, but not a requirement.)

In order to expand the number of viewpoints and better reflect those in field of Automation, nominees from industry and government, female and nonbinary candidates, and candidates from Central and South America, the Middle East, and Africa are especially encouraged.

**Please submit nominations to the “T-ASE Editorial Board Nomination Form for Term Starting Jan 1, 2027” (<https://forms.gle/ghkyUxYk2Rd1R6Sr8>) by 1 October 2026.**
