

Why Advertise?

The **IEEE Robotics and Automation Society** is a global community of leading innovators who explore how technology drives industry and impacts modern society and business—both today and tomorrow. *IEEE Robotics & Automation Magazine* publishes articles that help industry professionals understand new concepts in robotics and automation.

Readership

Content Curated for the Robotics and Automation Audience

The professionals who rely on *IEEE Robotics & Automation Magazine* for work-related information and solutions are working at the companies you want to reach, including:

- LTK Engineering Services
- Qualcomm Inc.
- Bombardier Transportation
- STV Inc.
- Parsons Brinckerhoff Inc.
- Nokia Corp.
- Ford Motor Co.
- Ericsson AB
- Jacobs Engineering
- General Motors

Reach the largest concentration of high-tech pros in the industry.

IEEE ROBOTS Bundle

Engaging. Interactive. Informative.

The IEEE ROBOTS Bundle is the best way to reach your target audience in the robotics and automation industries!

This bundle is an interactive, engaging way to reach your audience through the world of robotics. Advertise to an engaged audience that is interested and excited about the industry's products and services. Reach roboticists in industry, research, and startups, as well as K-12 and higher education sectors of STEM education.

Maximizing Your Reach: Bundle Advertising in Print and Online!

- Robotics content on *IEEE Spectrum*
- *IEEE Robots Guide*
- *IEEE Robotics & Automation Magazine*
- *Robotics News*

The IEEE audiences are early adopters of new approaches and technologies that apply to the engineering industry.

IEEE Spectrum

Robotics is the most-visited topical content page on **IEEE Spectrum's website**. More than 400,000 subscribers use the content in *IEEE Spectrum's* suite of media proactively—to help form opinions and make decisions, and as a reference for projects and discussions with colleagues.

ROBOTS

IEEE Robots Guide is an extension of *IEEE Spectrum's* Robotics, with the top robotics journals, largest robotics conferences, and best robotics coverage. Launched in 2018, the website is an up-to-date resource for robotics education and is a one-stop destination for students, educators, techies, and anyone interested in the fast-growing robotics industry.

IEEE Robotics & Automation Magazine is the industry authority, publishing technical articles of interest to the international robotics and automation community.

Robotics News

Robotics News delivers the advances in robotics, automation, control systems, and related areas through news and analysis, interviews with leading roboticists, featured events, and webinars. With 76k subscribers, you will reach a highly engaged audience of decision-makers who use *Robotics News* as a key resource when comparing and evaluating suppliers.

Robotics Content on spectrum.ieee.org

IEEE Spectrum (spectrum.ieee.org) is the flagship website of the IEEE, the world's largest professional organization devoted to engineering and the applied sciences.

- 250k unique page views monthly—that's 1/5 of all spectrum.ieee.org traffic!
- Growing a robotics following for 10+ years
- Keeping 400,000 members and a global network of non-members up-to-date on industry trends, the latest news in technology, and engaged with blogs, podcasts, and interactive content!

IEEE Robots Guide

Engagement:

- 300,000 page views
- 30,000 users
- 144 countries

User Activity:

- Visitors spend 10-30 minutes per visit
- Around 10 pages viewed per visit

Per Month:

- 117k robot interactives viewed
- 200k image views
- 90k videos generated
- 60k robot ratings
- 30k searches performed

IEEE Robotics & Automation Magazine

Reach the largest concentration of high-tech professionals

- 80,500+ subscribers
- 60% of readers are in the engineering and engineering management industry
- 82% of readers have 10+ years' experience in their field

The professionals who rely on *IEEE Robotics & Automation Magazine* for work-related information and solutions are working at the companies you want to reach, including: LTK Engineering Services | Qualcomm Inc. | Bombardier | Transportation | STV Inc. | Parsons Brinckerhoff Inc. | Nokia Corp. | Ford Motor Co. | Ericsson AB | Jacobs Engineering | General Motors

Robotics News

70,000 users read the *Robotics News* every month.

Robotics News delivers advances in robotics, automation, control systems, and related areas through news and analysis, interviews with leading roboticists, featured events, and webinars.

Coverage Areas/Topics

- Robotics
- Automation
- Control Systems

Markets/Industries Served

- Embedded Systems
- Robotics
- Transportation

With 76k subscribers, you will reach a highly engaged audience of decision-makers who use *Robotics News* as a key resource when comparing and evaluating suppliers!

Bundle them all today!

IEEE ROBOTS Bundle Pricing

Package	Discount	Regular Price	Bundle Rate	Inclusions/Features
Innovator Package	Innovator Package	\$80,000	\$40,000	• Four FP/FC ads in <i>IEEE Robotics & Automation Magazine</i> with the best available guaranteed positioning at the time of commitment • "Robot of the Week" editorial reviews (Limit 3 in 12 Months) • Editorial review preference via <i>IEEE Robots</i> editorial staff (Limit 3) displayed on robotsguide.com and in <i>Robotics News</i> • Sponsor logo with hyperlink on ALL pages of robotsguide.com • <i>Robotics News</i> – Four Sends – Best available ad type and position at time of commitment • Spectrum.ieee.org – \$10K to spend as desired on: Native, Sponsored Content Robotics Channel and/or Run-of-Site Banner Options • Four accompanying social media posts during the year

Package	Discount	Regular Price	Bundle Rate	Inclusions/Features
Intelligence Package	40% OFF	\$45,000	\$27,000	• Four ½ FC ads in <i>IEEE Robotics & Automation Magazine</i> with best available guaranteed positioning at time of commitment • “Robot of the Week” editorial reviews (Limit 2 in 12 Months) • Editorial review preference via <i>IEEE Robots</i> editorial staff (Limit 2) prominently displayed on robotsguide.com and in <i>Robotics News</i> • Sponsor logo with hyperlink on ALL pages of robotsguide.com • <i>Robotics News</i> – Two Sends – Best available ad type and position at time of commitment • Spectrum.ieee.org – \$10K to spend as desired on: Native, Sponsored Content Robotics Channel and/or Run-of-Site Banner Options • Two accompanying social media posts during the year
Integrator Package	40% OFF	\$25,000	\$15,000	• Four ½ FC ads in <i>IEEE Robotics & Automation Magazine</i> • One “Robot of the Week” editorial review • One editorial coverage via <i>IEEE Robots</i> editorial staff prominently displayed on robotsguide.com and in <i>Robotics News</i> • Sponsor logo with hyperlink on ALL pages of robotsguide.com • <i>Robotics News</i> – One Send – Best available ad type and position at time of commitment • Spectrum.ieee.org – \$5K to spend as desired on: Native, Sponsored Content Robotics Channel and/or Run-of-Site Banner Options • One accompanying social media post during the year

Editorial Calendar

Scheduled Issue	Title	Guest Editors
December 2025 Vol. 32, 4	Robot Ethics: Ethical, Legal and User Perspectives in the Development and Application of Robotics and Automation	Jim Torresen, Edson Prestes, Praminda Caleb-Solly, Yueh Hsuan Weng
March 2026 Vol. 33, 1	Embodied AI: Bridging Robotics and Artificial Intelligence Toward Real-World Applications	Hao Su, Yunduan Cui, Kuan Fang, Jens Kober, Yanan Li, Yunzhu Li, Takamitsu Matsubara, Maria Pozzi, Cosimo Della Santina, Bolei Zhou
June 2026 Vol. 33, 2	The Arts and Robotics	Jean Oh, Ken Goldberg, Perla Maiolino, James Bern, Hugo Rodrigue, Josie Hughes
September 2026 Vol. 33, 3	Regular Issue	N/A (papers from Regular track)
December 2026 Vol. 33, 4	Regular Issue	N/A (papers from Regular track)

Make your bundle the best it can be!

Event Sponsorship

The IEEE Robotics & Automation technical conferences and workshops offer a unique opportunity to participate in the advancement of the industry's research base.

Editorial Coverage

Explore opportunities to have your organization's editorial content featured in a *IEEE ROBOTS* Bundle publication.

Webinar/Whitepaper Sponsorship

Sponsor industry-relevant content sent to thousands of subscribers.

IEEE Robotics & Automation Career Center: Employers

Whether your organization has a team of 3, 30, or 300, your success begins with the people you hire. Once you've assembled the right team, smart talent management means tapping their full potential to drive your organization toward its goals.

The talent is out there. We'll help you find it and keep it. Use these resources when it's time to recruit and as you manage your staff to achieve high employee engagement, satisfaction, and performance.
